

## Description

GreenMap MIT is a project to produce green maps of Cambridge, Massachusetts and the MIT campus. A green map plots the locations of environmentally and culturally significant resources e.g; recycling centers, toxic waste sites, public art, community gardens and socially conscious businesses. The green map concept was created by Green Map System, Inc. as a means of public education.

## Printing

To conserve ink and paper, please do not print this page.

The map (pages 2 and 3 of this document) is intended to be printed double-sided, so that you can easily flip the map over (on the short edge/around the long axis) to locate details about a feature. While it scales nicely for printing on standard 8½"x11" (letter or A4) paper it is designed for 11"x17" (tabloid or A3) pages.

## Folding Instructions

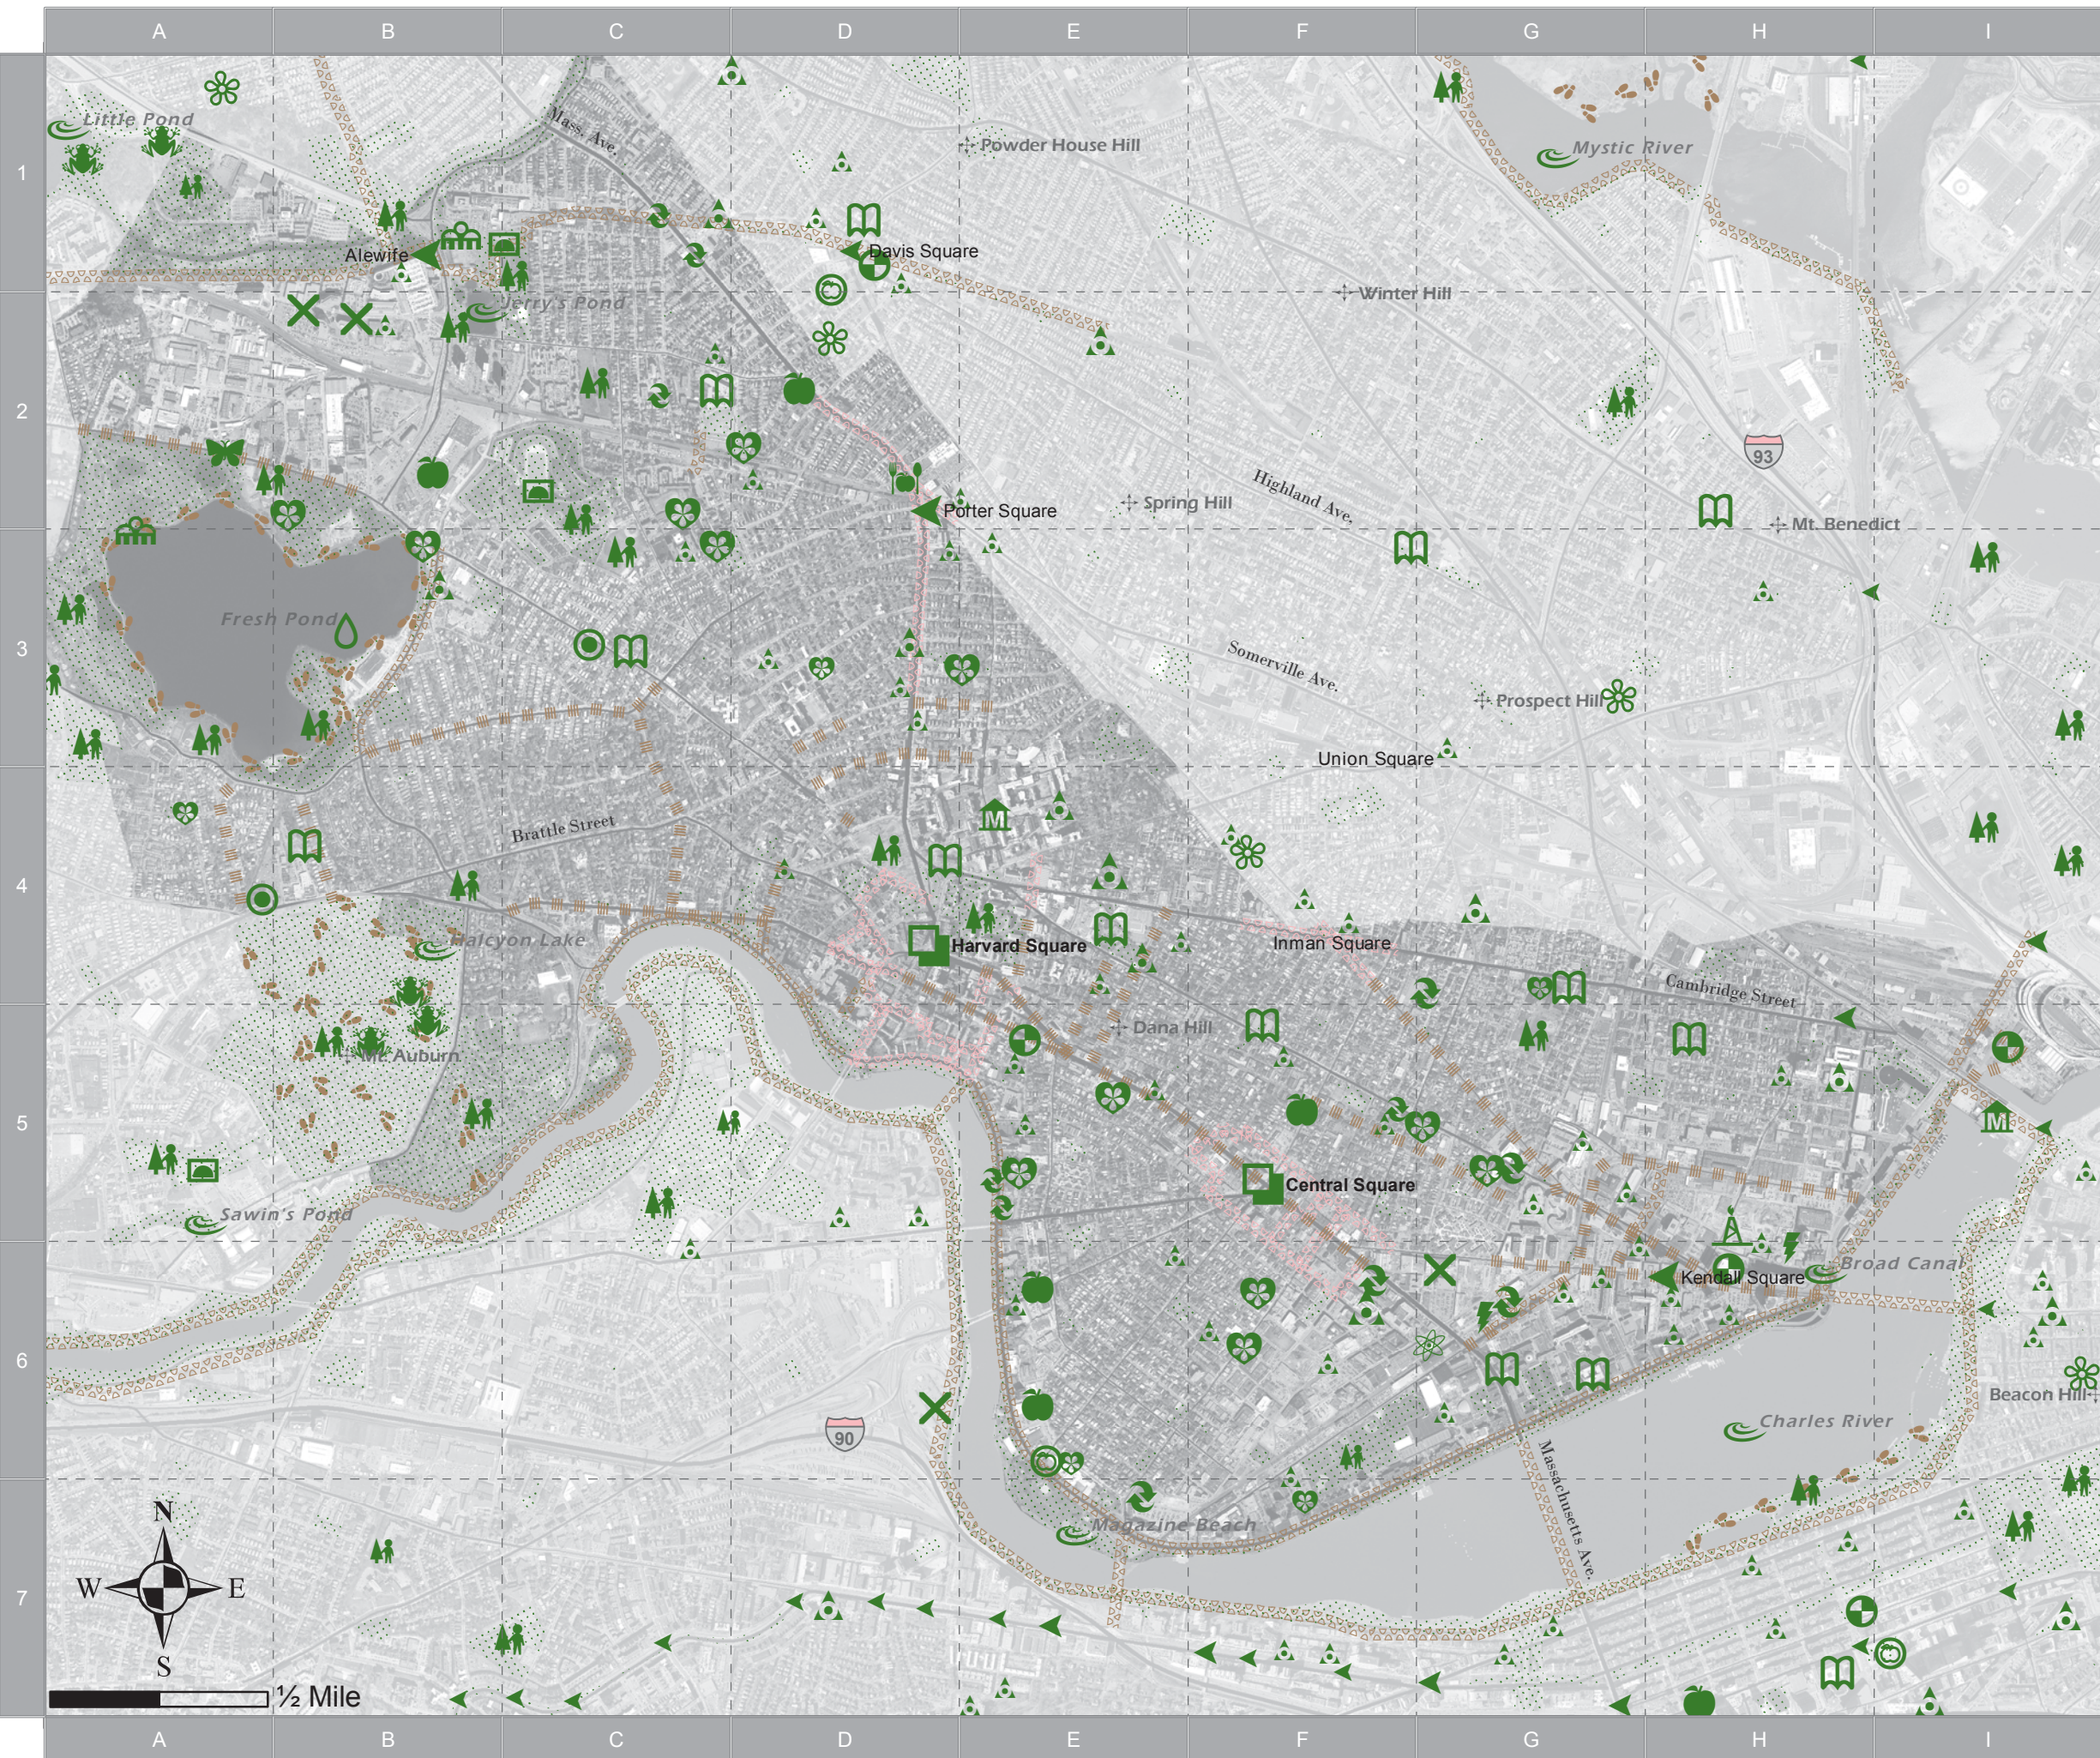

If printed on a tabloid sheet, the map will fold into a neat 4¼"x2¾" pocket-sized map like so:

1. Start with the map face up and the legend in the upper right hand corner.
2. Fold in half, bringing the right edge over to the left.
3. Fold in half, bringing the bottom edge up to the top.
4. Repeat steps 2 and 3.

## Participate

If you have comments or would like to contribute in some way, we'd love to hear from you! In the future we hope to host a live web map, offer larger printed maps, and increase our scope to include a wider variety of features for all of Camberville.
